Section 1. Identification of the substance/ mixture and of the company/ undertaking

1.1 Product identifier
Product name: KIBILAC ®
This safety data sheet pertains to the following products: PW-957, PW-997, PW-997G and PW-997S.

1.2 Relevant identified uses of the substance or mixture and uses advised against
Relevant identified uses: Mixture used for the production of molded plastic articles

1.3 Details of the supplier of the Safety Data Sheet
Supplier: Chi Mei Corporation
Address: 59-1, San Chia, Jen Te Village
Tainan City
Taiwan R.O.C.
Telephone: +886 6 2663000 Ext. 1347
Email: service@mail.chimei.com.tw

1.4 Emergency telephone number
Emergency telephone : +886 6 2663000 Ext. 2501

Section 2. Hazards identification

2.1 Classification of the substance or mixture
Classification according to Directive 67/548/EEC or 1999/45/EC: Not classified as hazardous (polymeric state)
Classification according to Regulation (EC) N° 1272/2008 (CLP): Not classified as hazardous (polymeric state)

2.2 Label elements
Not labelled as hazardous

2.3 Other hazards
vPvB/PBT assessment: not available
Swallowing may cause gastrointestinal irritation and pain of guts.

Section 3. Composition/information on ingredients

3.1 Composition of the substance/ preparation

<table>

3.3 For full text of R- and H- phrases: see section 16

Section 4. First-aid measures

4.1 Description of first aid measures

General notes: Remove affected persons from the danger area, at the same time ensuring your own safety. Remove all contaminated clothing immediately.

Following inhalation: In case of gases evolving from melted resin, move subject to fresh air. Treat symptomatically.

Following skin contact: In case of pellets or powder, wash with water. In case of smelt, wash affected skin area and clothing with plenty of (soap and) water. Seek medical advice.

Following eye contact: In case of pellets or powder, flush with plenty of water for at least 15 minutes. Seek medical advice if any dust particles still remain.

In case of gases evolving from melted resin of high temperature, flush with plenty of water for at least 15 minutes. Seek medical advice if necessary.

Following ingestion: Induce vomiting. Rinse mouth with water. Seek medical advice if necessary.

Self-protection of the first aider: -

4.2 Most important symptoms & effects both acute & delayed

Dust: Skin irritation, eye irritations and redness

4.3 Indication of any immediate medical attention and special treatment needed: -

Treat symptomatically.(Decontamination, vital functions)

Section 5. Fire-fighting measures

5.1 Extinguishing media

Suitable extinguishing agents: Water, foam, dry chemical powder.

For safety reasons unsuitable extinguishing agents: -

5.2 Special hazards arising from the substance or mixture: -
5.3 Advice for firefighters

Protective equipment: Self-contained breathing apparatus
Further measures: -

5.4 Additional information: -

### Section 6. Accidental release measures

6.1 Personal precautions, protective equipment & emergency procedures

Pellets or powder remained on ground may cause slipping
Wear protective equipment
Ensure adequate ventilation
Keep away from ignition sources
Keep unprotected persons away

6.2 Environmental precautions

Gather pellets and powder thoroughly to avoid birds or fishes taking from draining water.
Do not allow product to reach sewage system or water bodies. Inform respective authorities in case product reaches water, sewage system or soil

6.3 Methods and material for containment and cleaning up

Recovery if not contaminated or disposal

6.4 Reference to other sections

See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment.

### Section 7. Handling and storage

7.1 Precautions for safe handling

Protective measures: -

Measures to prevent fire: Prevent from fire around handling area

Measures to prevent aerosol and dust generation: maintain good housekeeping standards to prevent accumulation of dust. To avoid dust explosion resulting from the existence of powder, electrostatics eliminators and grounding should be fixed to such equipment as air transferring pipes, bag filters and hoppers. Use electrically conductive filters for bag filters.

Measures to protect the environment: -

Advice on general occupational hygiene: -

7.2 Conditions for safe storage, including any incompatibilities

Technical measures and storage conditions: Keep the material at a cool dry place. Protect from direct sunlight, rain and violent temperature fluctuation. Fire is inhibited around storage area.

Requirements for storage rooms and vessels: -

Suitable materials and coating: -

Unsuitable materials or coatings: -

Further information on storage conditions: -
7. Specific end use(s)

Recommendations: -

8. Exposure controls/personal protection

8.1 Control parameters

Exposure Limits: None established

8.2 Exposure control

Appropriate engineering controls: Install eyes washer and shower in the place of operation. Provide local exhaust ventilation system. Ensure compliance with applicable exposure limits

Personal protection:
- Respiratory protection: Wear masks for cleaning molding machines
- Hand protection: Heat-insulating gloves when handling molten form
- Eye protection: Wear safety glasses for general purpose. Wear chemical goggles for cleaning molding machines
- Skin and body protection: Gloves necessary for handling melted resin
- Hygiene measures: Wash hands after handling

8.3 Environmental exposure controls

Product related measures to prevent exposure: None specific

Instruction measures to prevent exposure: None specific

Organizational measures to prevent exposure: None specific

Technical measures to prevent exposure: None specific

Environmental exposure controls: Do not allow product to reach sewage system or water bodies

9. Physical and chemical properties

9.1 Information on basic physical and chemical properties

<table>

9.2 Other safety information: -
Section 10. Stability and reactivity

10.1 Reactivity: Non-reactive under normal handling and storage conditions

10.2 Chemical stability: Stable under normal handling and storage conditions

10.3 Possible hazardous reaction: -

10.4 Conditions to avoid: Avoid excessive heat, flames and all sources of ignition

10.5 Incompatible materials: not applicable

10.6 Hazardous decomposition products: not applicable

Section 11. Toxicological information

11.1 Information on toxicological effects

Information on the likely routes of exposure: Oral, Dermal, Inhalation.

Potential acute health effects
Skin contact: No known significant effects or critical hazards.
Eye contact: No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics
Ingestion: No specific data.
Inhalation: No specific data.
Eye contact: No specific data.

Section 12. Ecological information

12.1 Toxicity
no data available

12.2 Persistence and degradability
no data available

12.3 Bioaccumulative potential
To avoid bioaccumulation plastics should not be disposed in the sea or in other water environments.

12.4 Mobility in soil
no data available

12.5 Results PBT & vPvB assessment
According to the revised Annex XIII of regulation (EC) 1907/2006 and (EC) 253/2011: No information available on the product as such
12.5 Other adverse effects:
General information: Do not allow to enter into ground-water, surface water or drains.

12.7 Additional information: -

### Section 13. Disposal considerations

#### 13.1 Waste treatment methods
- Product / Packaging disposal: Dispose in accordance with the current local regulations.
- Waste codes according to European Waste Catalogue: -
- Waste treatment-relevant information: Inadequate incineration may generate toxic gases such as CO, HCN, AN and SM
- Sewage disposal-relevant information: -
- Other disposal recommendations: -

no data available

Section 15. Regulatory information

15.1 Safety, health and environmental regulations /legislation specific for the substance or mixture
Authorization and / or restrictions on use: None
Other national regulations: -

15.2 Chemical Safety Assessment
For this substance a chemical safety assessment is not yet required.

Section 16. Other information

16.1 Indication of changes
Version 1: First issue according to Regulations (EC) 1907/2006 (REACH) & 1272/2008 (CLP)

16.2 Abbreviations and acronyms

16.4 Relevant R-phrases and/or H-statements (number and full text):

H220 Extremely flammable gas R10 Flammable
H225 Highly flammable liquid and vapour R11 Highly flammable
H226 Flammable liquid and vapour R12 Extremely flammable
H301 Toxic if swallowed R20 Harmful by inhalation
H311 Toxic in contact with skin R23/24/25 Toxic by inhalation, in contact with skin and if swallowed
H315 Causes skin irritation
H317 May cause an allergic skin reaction R36 Irritating to eyes
H318 Causes serious eye damage R37 Irritating to respiratory system
H319 Causes serious eye irritation R38 Irritating to skin
H331 Toxic if inhaled R40 Limited evidence of a carcinogenic effect
H332 Harmful if inhaled R41 Risk of serious damage to eyes
H335 May cause respiratory irritation R43 May cause sensitisation by skin contact
H340 May cause genetic defects R44 May cause cancer
H350 May cause cancer R46 May cause inheritable genetic damage
H351 Suspected of causing cancer R50/53 Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment
H400 Very toxic to aquatic life
H411 Toxic to aquatic life with long lasting effects R51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment

16.5 Training advice:

16.6 Further information: According to the guidance version 2.0 for monomers and polymers from the European Chemicals Agency dated as of April 2012, the classification of the polymer takes into account the classification of all its constituents, such as unreacted monomers. These constituents in fact should be taken into account for classification of the polymer. This means that the same classification methods as for mixture should be applied to polymer substances. In order to determine a classification for the studies about the water soluble fraction as well as the absorption should be performed on the polymer as such.
